HOW TO USE

Your best looks begin with a good haircut that is well maintained. You should always treat your hair with the best quality shampoos, conditioners and styling products.

This lightweight hair dryer is a powerful styling tool and must always be used with care. To avoid damage to your hair do not use hair dryer frequently. Always select a setting that is suitable for your hair type.

TAKE CARE NOT TO COV ER THE AIR INLET GRILLE WITH YOUR HAND WHEN STYLI NG. TAKE CARE WHEN HANDLING HOT SURFACES.

1. Ensure your hands are dry and are not dripping wet.
2. Plug the unit into a suitable wall electric outlet and switch on. Select the desired heat/speed setting (0-1-2).
3. Dry and style your hair as desired.
4. Switch off by setting the on/off and speed switch to the off position to "0" and unplug your dryer from the mains supply socket. Allow your dryer to cool fully before storing.

BLOW DRYING

Attach the concentrator nozzle and hold the dryer approximately 20 cm (8 inches) away from the hair while drying. To reduce frizz, dry the hair with the dryer pointing down the hair shaft in order to smooth down the hair follicles.

STYLING GUIDE

Hair Drying Basics Steps:

Step 1: Wash hair with your favorite shampoo and conditioner.
Step 2: After washing the hair, towel dry hair.
Step 3: Comb or brush your hair so that it is detangled and smooth.
Step 4: In order to protect hair from heat exposure, it is recommended to prepare hair before drying with a hair protector serum or spray. Spray protector or rub a few drops of your favorite hair protector to your hair.
Step 5: Distribute protector evenly by combing or brushing hair and part hair in sections and secure with clips.
Step 6: Attach the concentrator to your dryer; select the heat setting and the speed of the air. It is recommended to start at a low temperature setting and change to a higher temperature setting if you desire.
Step 7: Start with the back section of the head. Begin by drying small, manageable sections of your hair with a large round brush. Dry one section of hair at a time. Dry from the roots to the ends, moving the brush and the dryer together down the hair shaft.
Step 8: Move the dryer steadily across each section of the hair and always keep the airflow angled down toward the ends. This will make the cuticles lie flat and make your hair look smoother and shinier. Work your way around your head to the front of the head.
NOTE: To prevent burning the scalp, always direct airflow at hair not scalp.
Step 9: The end result should be smooth and full of volume hair.
